

SMOOTH OPERATION EVEN IN CONFINED SPACES.

# PW23-PW30

4,500 – 6,000 LB CAPACITY ELECTRIC WALKIE

## 1. Efficient

### Enhanced System

Designed with an Alternating Current (AC) drive system, these walkies offer precise speed control, smooth directional changes and quiet operation.

### Operator Control

Pallet positioning and pinwheeling in tight areas, like trailers, is easy with this walkie. The small footprint allows operators to easily maneuver in confined spaces, allowing for optimum productivity.

## 2. Comfortable

### Dual Controls

With controls mounted on both sides of the handle, operating the walkie is comfortable from either side of the truck and while working in confined areas.

### Smooth Operation

With ease of handling and low steer effort, the gas cylinder handle assembly offers comfort and smooth operation.

## 3. Smart

### Incline Performance

Due to the motor and high output controller, this walkie achieves high levels of performance and control on grades. This level of performance supports your operators in moving more pallets in less time.

### Innovative Braking

Providing increased productivity, the PW23-30 electromagnetic brake system is substantially easier to maintain than mechanical brake systems due to its reduced wear on the brake components.

## 4. Durable

### Directional Reverse

The “smart” directional reverse switch is designed for activation only when traveling in a tractor-first direction, providing added protection for the operator and your application.

### Short Battery Box

Ideal for applications with confined spaces, the PW23 with short battery box features a head length of 19.4 inches, making it easy to maneuver in even the most congested areas.

[1] Load section lowered: add 2.10 inches.

[2] Add 8 inches for maneuvering space.

Note: all dimensions with 48 inch (nominal) forks unless otherwise noted.

## SAFETY STANDARDS

These trucks meet American National Standards Institute/Industrial Truck Standards Development Foundation, ANSI/ITSDF B56.1. UL-Classified by Underwriters Laboratories, Inc., as to fire and electric shock hazard only; Type E, EE (optional), Industrial Trucks. Users should be aware of, and adhere to, applicable codes and regulations regarding operator training, use, operation and maintenance of powered industrial trucks, including:

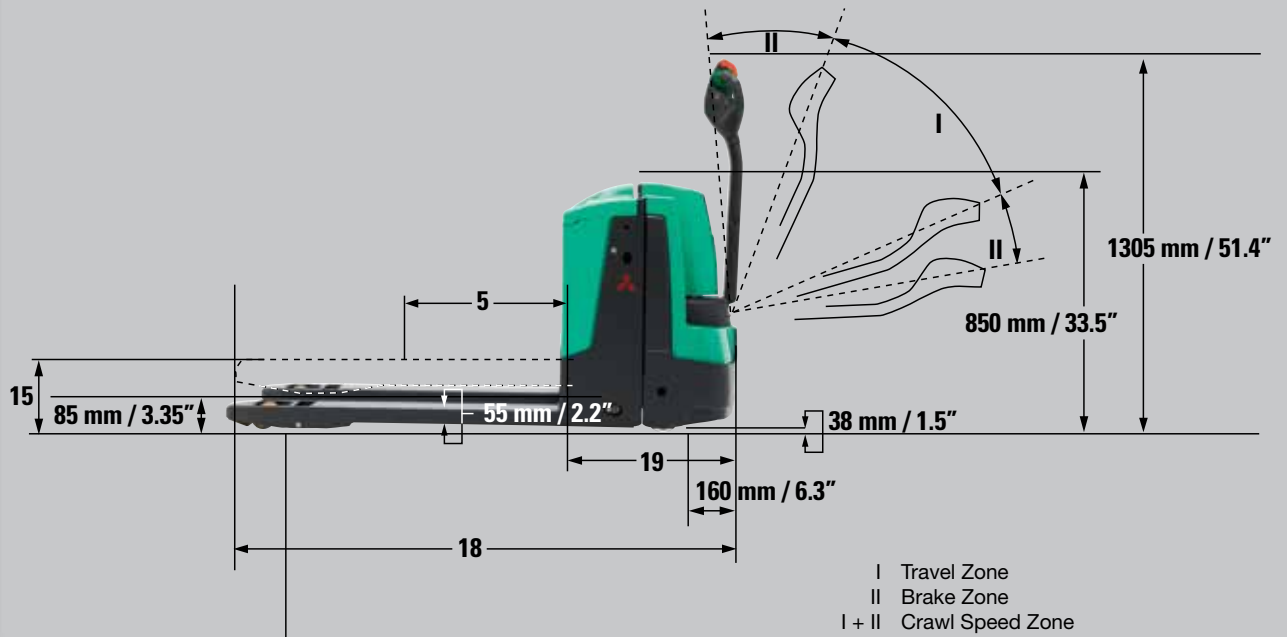

- ANSI/ITSDF B56.1.
- NFPA 505, fire safety standard for powered industrial trucks -type designations, areas of use, maintenance and operation.
- Occupational Safety and Health Administration (OSHA) regulations that may apply.

Specifications, equipment, technical data, photos and illustrations based on information at time of printing and subject to change without notice. Some products may be shown with optional equipment.

4,500 – 6,000 LB CAPACITY ELECTRIC WALKIE

## Flexible Options

### 1. Reduced Wear And Tear

The optional ProTracLink stability caster wheel system helps stabilize the forklift when moving large or loose loads. The system evenly distributes forces during travel, helping to reduce the chance of damage when traveling over dock plates.

### 2. Keypad Access

Keypad access allows each operator to have a personal code. This option also gives the operator a choice between three drive modes (economy, medium and high performance).

### 3. Integrated Charger

The integrated charger option helps increase productivity by allowing convenient opportunity charging during breaks and lunches. The added benefit is increased uptime in extended shift operations.

### 4. Discharge Indicator

The walkie's current battery life is displayed through the LED battery discharge indicator. The operator has access to more data through the optional "CanDis" information panel, containing an enhanced visual charge indicator, hour meter and service code display.

Manufactured with superior quality and exceptional value, Mitsubishi forklift trucks are supported by an extensive dealer and field support network located throughout North and South America. Don't forget to ask your local Mitsubishi forklift truck dealer about details on factory retail programs, financing plans and additional options and dealer services like planned maintenance and operator training.
